Join us for a live Q & A for CHAD Majors

Dr. Janice Phung, CHAD Faculty Member, 1-2 pm

Research Chat

Did you know that psychology is not just about the behavior of people, but also about the behavior of animals? Some psychologists find animals even more fascinating than human beings, and want to understand how and why they do what they do! Here's your chance to talk to a psychology faculty member who, along with her students, studies monkeys, dogs, elephants, and a variety of other species of animals.

Dr. Nancy Caine, 1- 2 pm
